## **Conflict Minerals Policy Statement**

Power Standards Lab (“PSL”) is committed to sourcing components and materials from companies that share our values around human rights, ethics and environmental responsibility. We expect all of our suppliers to abide by the requirements of our Supplier Code of Conduct, which prohibits human rights abuses and unethical practices. We also require all suppliers to comply with applicable legal standards and requirements.

On August 22, 2012, the U.S. Securities and Exchange Commission (“SEC”) issued the final conflict minerals rule under Section 1502 the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Conflict Minerals Rule”). The Conflict Minerals Rule requires publicly traded companies to report annually the presence of conflict minerals (tin, tungsten, tantalum and gold, or “3TG”) originating in the Democratic Republic of the Congo or adjoining countries (“Covered Countries”).

PSL supports the goal of ending violence, human rights violations and environmental devastation in the Covered Countries. Even though PSL a privately held company, we are committed to certifying that the material in our product is “DRC Conflict Mineral Free.”

PSL, like many companies in electronic product industries, uses some of these materials in the manufacturing of its products as they are required for the functional performance of the products. PSL does not purchase these metals directly from smelters or mines, so we must rely on the source information provided by our suppliers. PSL is working closely with our direct suppliers to trace newly mined minerals back to their origin in order to ensure responsible sourcing. As tracing methods evolve, we intend to incorporate appropriate proven methods in our program.

PSL will assist our customers in implementing their conflict minerals programs. We strive to work cooperatively with our customers and supply chain partners in implementing conflict minerals compliance programs.

PSL has begun requiring suppliers to provide us with completed conflict minerals declarations using the EICC/GeSI Conflict Minerals Reporting Template. We may reconsider our willingness to partner with suppliers that fail to comply with this Policy.
